

Voluntary Product Accessibility Template® (VPAT™) Web-Based Internet Information and Applications

Criteria	Support Level (Meets, Partially Meets, Does Not Meet)	Remarks and Explanations
(a) A text equivalent for every non-text element shall be provided (e.g. via “alt”, “longdesc”, or in element content).	Partially Meets	BiblioLabs continues to add text elements to graphics in the platform and intends to be WCAG 2.0 Level AA compliant in the near future.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation	Does Not Meet	This feature is currently on the development roadmap
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup	Meets	All aspects of the BiblioBoard platform meet this criterion.
(d) Documents shall be organized so they are readable without requiring an associated style sheet	Meets	
(e) Redundant text links shall be provided for each active region of a server-side image map.	N/A	BiblioBoard does not utilize image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	N/A	BiblioBoard does not utilize image maps.
(g) Row and column heads shall be identified for data tables	N/A	BiblioBoard does not use data tables for display.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels or row or column headers.	N/A	BiblioBoard does not use data tables for display.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Meets	
(j) Pages shall be designed to avoid causing the screen to flicker with frequency greater than 2 Hz and lower than 55 Hz	Meets	

<p>(k) A text-only page with equivalent information or functionality shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	<p>Meets</p>	<p>BiblioLabs is willing to provide this information for any pages where needed.</p>
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Meets</p>	
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with all of the criteria contained within the Voluntary Product Accessibility Template for Software Applications and Operating Systems.</p>	<p>N/A</p>	<p>BiblioBoard does not make use of any plug-ins or apps in the platform.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>N/A</p>	<p>BiblioBoard does not make use of electronic forms.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Partially Meets</p>	<p>BiblioLabs continues to add ARIA tags and other enhancements in the platform to completely comply with this criterion and intends to be WCAG 2.0 Level AA compliant in the near future.</p>
<p>(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.</p>	<p>N/A</p>	<p>BiblioBoard does not require timed responses in the platform.</p>
